

Cox Business keeps your business GOING NO MATTER WHAT.

The Cox Business network offers potent combinations of security, redundancy and data center accessibility for Arizona businesses. Whether you have a growing midsize company or thriving enterprise, Cox Business data center connectivity provides the most secure options that businesses demand.

By building diverse fiber entries into both the Phoenix NAP data center and i/o Data Centers Phoenix ONE, Cox Business offers full-service network solutions. Multiple OC-192 fiber rings, combined with Dense Wavelength capabilities, offer the highest network bandwidth availability and multi-services delivery with guaranteed redundancy. Cox Business can serve as the primary or backup network connection for data center customers, meeting and exceeding business continuity requirements for mission-critical applications.

PHOENIX NAP

Phoenix NAP features 148,000 square feet of raised-floor data center space supported by divergent network feeds. The facility also has full redundant power, which allows for the distribution chain to be serviced without losing any operational performance.

The Phoenix NAP facility overlays 12 layers of security, and first-responder engineers monitor all systems 24/7 against threats to networks, power, heating and cooling, and from natural disasters. Phoenix NAP is an SAS 70 Type II-certified facility and a PCI DSS Validated Services Provider with systems that meet or exceed the highest industry standards. The data center is designed to meet the needs of small to midsize businesses by offering an affordable enterprise-quality colocation facility.

I/O DATA CENTERS PHOENIX ONE

One of the largest commercial colocation facilities in the world, i/o Data Centers Phoenix ONE represents more than 530,000 square feet of space for enterprise businesses' mission-critical IT systems. The data center facility includes approximately 460,000 square feet of raised floor and utilizes advanced power, cooling and access control systems to ensure "always on" service.

Cox Business customers can easily and quickly extend their existing Wide Area Network services to connect to i/o Data Centers Phoenix ONE.
